**The Art of the Start 2.0** Guy Kawasaki 2015-03-03 Fully revised and expanded for the first time in a decade, this is Guy Kawasaki's classic, bestselling guide to launching and making your new product, service, or idea a success. Whether you're an aspiring entrepreneur, small-business owner, intrapreneur, or not-for-profit leader, there's no shortage of advice on topics such as innovating, recruiting, fund raising, and branding. In fact, there are so many books, articles, websites, blogs, webinars, and conferences that many startups get paralyzed, or they focus on the wrong priorities and go broke before they succeed. The Art of the Start 2.0 solves that problem by distilling Guy Kawasaki's decades of experience as one of the most hardworking and irreverent strategists in the business world. Guy has totally overhauled this iconic, essential guide for anyone starting anything. It's 64 percent longer than version 1.0 and features his latest insights and practical advice about social media, crowdfunding, cloud computing, and many other topics. Guy understands the seismic changes in business over the last decade: Once-invulnerable market leaders are struggling. Many of the basics of getting established have become easier, cheaper, and more democratic. Business plans are no longer necessary. Social media has replaced PR and advertising as the key method of promotion. Crowdfunding is now a viable alternative to investors. The cloud makes basic infrastructure affordable for almost any new venture. The Art of the Start 2.0 will show you how to effectively deploy all these new tools. And it will help you master the fundamental challenges that have not changed: building a strong team, creating an awesome product or service, and facing down your competition. As Guy likes to say, "Entrepreneur is a state of mind, not a job title." His book will help you make your crazy ideas stick, through an adventure that's more art than science – the art of the start.

Don't Unplug Chris Dancy 2018-09-18 Chris Dancy, the world's most connected person, inspires readers with practical advice to live a happier and healthier life using technology In 2002, Chris Dancy was overweight, unemployed, and addicted to technology. He chain-smoked cigarettes, popped pills, and was angry and depressed. But when he discovered that his mother kept a record of almost every detail of his childhood, an idea began to form. Could knowing the status of every aspect of his body and how his lifestyle affected his health help him learn to take care of himself? By harnessing the story of his life, could he learn to harness his own bad habits? With a little tech know-how combined with a healthy dose of reality, every app, sensor, and data point in Dancy's life was turned upside down and examined. Now he's sharing what he knows. That knowledge includes the fact that changing the color of his credit card helps him to use it less often, and that nostalgia is a trigger for gratitude for him. A modern-day story of rebirth and redemption, Chris' wisdom and insight will show readers how to improve their lives by paying attention to the relationship between how we move, what we eat, who we spend time with, and how it all makes us feel. But Chris has done all the hard work: Don't Unplug shows us how we too can transform our lives.

**Ten Years a Nomad** Matthew Kepnes 2019-07-16 Part memoir and part philosophical look at why we travel, filled with stories of Matt Kepnes' adventures abroad, an exploration of wanderlust and what it truly means to be a nomad. Part travel memoir and part philosophical look at why we travel, it is filled with aspirational stories of Kepnes' many adventures. *New York Times* bestselling author of *How to Travel the World on \$50 a Day*, Matthew Kepnes

knows what it feels like to get the travel bug. After meeting some travelers on a trip to Thailand in 2005, he realized that living life meant more than simply meeting society's traditional milestones, such as buying a car, paying a mortgage, and moving up the career ladder. Inspired by them, he set off for a year-long trip around the world before he started his career. He finally came home after ten years. Over 500,000 miles, 1,000 hostels, and 90 different countries later, Matt has compiled his favorite stories, experiences, and insights into this travel manifesto. Filled with the color and perspective that only hindsight and self-reflection can offer, these stories get to the real questions at the heart of wanderlust. Travel questions that transcend the basic "how-to," and plumb the depths of what drives us to travel — and what extended travel around the world can teach us about life, ourselves, and our place in the world. *Ten Years a Nomad* is for travel junkies, the travel-curious, and anyone interested in what you can learn about the world when you don't have a cable bill for a decade or spend a month not wearing shoes living on the beach in Thailand.

**Recent Advances in Natural Language Processing** Ruslan Mitkov 1997-01-01 This volume is based on contributions from the First International Conference on "Recent Advances in Natural Language Processing" (RANLP'95) held in Tzigrich, Bulgaria, 14-16 September 1995. This conference was one of the most important and competitively reviewed conferences in Natural Language Processing (NLP) for 1995 with submissions from more than 30 countries. Of the 48 papers presented at RANLP'95, the best (revised) papers have been selected for this book, in the hope that they reflect the most significant and promising trends (and latest successful results) in NLP. The book is organized thematically and the contributions are grouped according to the traditional topics found in NLP: morphology, syntax, grammars, parsing, semantics, discourse, grammars, generation, machine translation, corpus processing and multimedia. To help the reader find his/her way, the authors have prepared an extensive index which contains major terms used in NLP; an index of authors which lists the names of the authors and the page numbers of their paper(s); a list of figures; and a list of tables. This book will be of interest to researchers, lecturers and graduate students interested in Natural Language Processing and more specifically to those who work in Computational Linguistics, Corpus Linguistics and Machine Translation.

**Rich Man Poor Man** Adam Carolla 2012-01-17 If you turn on the evening news or listen to NPR you'll be bombarded with a non-stop parade of commentators pontificating on the ever expanding gap between the rich and the poor. Combining Adam's inimitable comedic voice and four-color illustrations by his friend Michael Narren, *Rich Man Poor Man* is a hilariously accurate look at what the people born with silver spoons in their mouths have in common with the people whose only utensils are plastic sporks stolen from a Shakey's.

Case Studies in Ecotourism Ralf Buckley 2003-01-01 As a counterpart to the growing volume of more theoretical literature in ecotourism, this volume presents a global compilation and analysis of over 170 real-life case studies in ecotourism, selected after an extensive screening process. It includes ecotours on land and sea, ecolodges and resorts, private reserves and public parks. The case studies range from the world's best models to test cases, small and large, unique to representative. Data has been drawn from independent audits by the author and others, as well as from published reports from universities, multilateral and non-government organizations. The book shows what ecotourism can achieve, what constraints it faces, and provides a convenient and comprehensive reference for ecotourism enterprises, development agencies and university teaching.
